Carmen Díaz

Software Engineer | San Francisco Bay Area hola@carmendiaz.io | LinkedIn | carmendiaz.io | US Citizen

PROFESSIONAL SUMMARY

Full-stack Software Engineer experienced in building production web applications across healthcare, workforce management, and insurance. Backend-focused, with deep experience in Ruby on Rails, REST APIs, and third-party integrations, plus hands-on experience with Python and Django, and frontend development using React and Next.js. I collaborate closely with stakeholders to turn ambiguous requirements into production-ready features, from initial scope through deployment. Fluent in English and Spanish, based in the San Francisco Bay Area, and experienced with AI-assisted development tools.

Technical Skills

Core Stack: Ruby on Rails, React, Next.js, Python, Django, Ruby, JavaScript, TypeScript, TailwindCSS, SQL
Databases: PostgreSQL, MySQL
Cloud & DevOps: AWS (S3), Google Cloud Platform, Vercel, Railway, GitHub, CI/CD
AI, Agents & Data: Hands-on agent framework projects (CopilotKit, Gemini ADK), Prompt Engineering, Data Science (Pandas, NumPy), Foundational ML (TensorFlow, PyTorch)
Practices: API Design, System Design, TDD (Minitest/RSpec/Capybara), Agile/Scrum

Experience

Independent Software Engineering Consultant (Full-Stack) | Remote | Nov 2020 – Present

- Partner with startups and small businesses to deliver full-stack features from initial requirements through production using Ruby on Rails, React, Next.js, TypeScript, and PostgreSQL.
- Building and maintaining a Ruby on Rails auto repair shop management application, currently in production beta, incorporating feedback from a repair shop client.
- Integrated the NHTSA vPIC API to automatically retrieve vehicle information from VINs, simplifying vehicle intake and reducing manual data entry.
- Use AI coding assistants (Codex, Antigravity, Claude) to accelerate development, evaluate implementation approaches, review code, and identify edge cases.
- Co-led a technical mentorship initiative for 50 women in tech, guiding participants through cloud computing fundamentals in partnership with Google Cloud, Kuñatech, and SheWorks.

Solutions Engineer | Mobile Health Consumer, Palo Alto, CA | Feb 2022 – Feb 2023

- Integrated the Lokalise API with a Django-based backend to extract hard-coded assets and deliver localized content through JSON and metadata configurations for U.S. and Canadian wellness experiences.
- Built configurable frontend components and internal setup tools backed by metadata, reducing manual configuration work.
- Worked with product, design, and operations to turn workflow needs into shipped features.

Delivery Lead – Software Engineer | Homebase, San Francisco, CA | May 2018 – Apr 2020

- Integrated the Clover API with internal TimeClock systems, exposing real-time data visibility across 175,000+ business clients and improving operational efficiency by ~50%.
- Designed and shipped 10+ RESTful APIs using Ruby on Rails and PostgreSQL to back core mobile scheduling and time-tracking features.
- Built an HR engagement tool using Sidekiq background jobs, increasing active users and employee participation by 33%.
- Owned end-to-end feature delivery, from initial product requirements to deployment, collaborating with designers and product managers to ship scalable, user-focused solutions.

Software Engineer | Omada Health, San Francisco, CA | May 2016 – Dec 2017

- Built a backend data service using Ruby, Sidekiq, and the Eligible API to handle bulk employee data imports, saving health insurance providers an estimated 144 hours of manual data processing.
- Built backend logic for an eligibility detection tool, reducing data processing time by 60%.
- Implemented Spanish onboarding through Rails internationalization, expanding customer reach by approximately 14%.

Software Engineer | CoverHound Insurance, San Francisco, CA | Mar 2015 – Dec 2015

- Built Rails and React insurance quoting and purchasing flows using a third-party quote API, reducing quote turnaround from 24 hours to under three minutes.

Education

Dual degrees earned concurrently from separate universities:

- B.S. Computer Systems Analysis — Catholic University of Asunción, Paraguay
- BBA Business Administration and Management — National University of Asunción, Paraguay

Specialization in University Didactics — National University of Asunción, Paraguay

---

Continuing Education

- **AI & Machine Learning Bootcamp — Caltech (2024)**
  Focus on Python, Data Science (Pandas, NumPy), Foundational ML (TensorFlow, PyTorch), Deep Learning, and Generative AI.
- **Data Science Fundamentals — National University of Asunción (2023)**
  Completed training in data science concepts with Python, Pandas, NumPy, and Matplotlib

ADDITIONAL TRAINING

- Generative AI for Software Developers — IBM (In Progress)
- Google Prompting Essentials — Google (2025)
- Generative AI for Everyone (2023) & AI for Good (2024) — DeepLearning.AI

Community & Volunteer Experience

Passionate about mentoring, teaching, and advocating for Women in Tech.

- **Event Co-organizer** | IA Week LATAM | Nov 2025
- **Technical Community Ambassador** | Women Techmakers Ambassador by Technovation | Kuñatech PY (*Paraguayan Women in Tech Community*) | AI and Data Science Paraguay
- **AI Education Program Lead** | K–8 School
  Designed and delivered an AI education framework that simplified machine learning concepts for K–8 students, increasing program engagement by approximately 30%.
- **Early Contributor** | Railsbridge (Bridge Foundry – Nonprofit supporting tech education)
