Carmen Díaz

Software Engineer | San Francisco Bay Area karmenatwork@gmail.com | LinkedIn | carmendiaz.io | US Citizen

PROFILE

Software Engineer with experience building production web applications across health, workforce, and insurance products. Backend-focused, with deep experience in Ruby on Rails, REST APIs, and third-party integrations, plus hands-on work with Python and Django, and frontend development using React and Next.js. I work closely with stakeholders to turn ambiguous needs into features, from initial scope through deployment. Fluent in Spanish and English, based in the San Francisco Bay Area, and energized by in-person collaboration. I use modern AI tools in my development workflow while continuing to build my experience with AI applications.

Technical Skills

Core Stack: Ruby on Rails, Django, React, Next.js, Python, Ruby, JavaScript, TypeScript, SQL
Databases: PostgreSQL, MySQL
Cloud & DevOps: AWS (S3), Google Cloud Platform, Vercel, Railway, GitHub, CI/CD
AI, Agents & Data: Hands-on agent framework projects (CopilotKit, Gemini ADK), Prompt Engineering, Data Science (Pandas, NumPy), Foundational ML (TensorFlow, PyTorch)
Practices: API Design, System Design, TDD (Minitest/RSpec/Capybara), Agile/Scrum

Experience

Software Engineering Consultant (Full-Stack Focus) | Remote | Nov 2020 – Present

- Partner with startups and small businesses to move full-stack features from ambiguous requirements through production using Rails, React/Next.js, TypeScript, and PostgreSQL
- Currently building an auto repair shop management application, incorporating feedback from an auto repair shop client.
- Integrated the NHTSA vPIC API to prefill vehicle details from a VIN, reducing manual entry during vehicle setup.
- I build and refine features with Codex and Antigravity, using them to explore implementation options, review code, and work through edge cases. Recently began exploring Claude.
- Designed and delivered a K–8 AI education framework that simplified machine learning concepts and increased program engagement by ~30%.
- Co-led a technical mentorship initiative for 50 women in tech, guiding participants through cloud computing fundamentals in partnership with Google Cloud, Kuñatech, and SheWorks.

Solutions Engineer | Mobile Health Consumer, Palo Alto, CA | Feb 2022 – Feb 2023

- Integrated the Lokalise API with a Django-based backend to extract hard-coded assets and deliver localized content through JSON and metadata configurations for U.S. and Canadian wellness experiences.
- Built configurable frontend components and internal setup tools backed by metadata, reducing manual configuration work.
- Worked with product, design, and operations to turn workflow needs into shipped features.

Delivery Lead – Software Engineer | Homebase, San Francisco, CA | May 2018 – Apr 2020

- Designed and shipped 10+ RESTful APIs using Ruby on Rails and PostgreSQL to back core mobile scheduling and time-tracking features.
- Integrated the Clover API with internal TimeClock systems, exposing real-time data visibility across 175,000+ business clients and improving operational efficiency by ~50%.
- Built an HR engagement tool using Sidekiq background jobs that increased active user and employee participation by 33%.
- Owned end-to-end feature delivery, from initial product requirements to deployment, collaborating with designers and product managers to ship scalable, user-focused solutions.

karmenatwork@gmail.com | LinkedIn | carmendiaz.io | US Citizen

Software Engineer | Omada Health, San Francisco, CA | May 2016 – Dec 2017

- Built a backend data service using Ruby, Sidekiq, and the Eligible API to handle bulk employee data imports, saving health insurance providers an estimated 144 hours of manual data processing.
- Built backend logic for an eligibility detection tool, reducing data processing time by 60%.
- Implemented Spanish onboarding through Rails internationalization, expanding customer reach by approximately 14%.

Software Engineer | CoverHound Insurance, San Francisco, CA | Mar 2015 – Dec 2015

- Built Rails and React insurance quoting and purchasing flows using a third-party quote API; shortened quote turnaround from 24 hours to under three minutes.

Education

Dual degrees earned concurrently from separate universities:

- **B.S. Computer System Analysis** | Catholic University of Asunción, Paraguay
- **BBA Business Administration and Management** | National University of Asunción, Paraguay
- **Specialization in University Didactics** | National University of Asunción, Paraguay

---

Continuing Education

Artificial Intelligence & Machine Learning Bootcamp | Caltech (2024)

- Immersive program with a focus on Python, Data Science (Pandas, NumPy), Foundational ML (TensorFlow, PyTorch), Deep Learning, and Generative AI.

Data Science Fundamentals – National University of Asunción (2023)

- Completed training in data science concepts with Python, Pandas, NumPy, and Matplotlib

Additional Technical Training

- Generative AI for Software Developers Specialization | IBM (In Progress)
- Google Prompting Essentials | Google (Apr 2025)
- AI for Good Specialization | DeepLearning.AI (2024)
- Generative AI for Everyone | DeepLearning.AI (2023)

Volunteer Experience

Passionate about mentoring, teaching, and advocating for Women in Tech.

- **Event Co-organizer** | IA Week LATAM | Nov 2025
- **Technical Community Ambassador** | Women Techmakers Ambassador by Technovation | Kuñatech PY (*Paraguayan Women in Tech Community*) | AI and Data Science Paraguay
- **Early Contributor** | Railsbridge (Bridge Foundry – Nonprofit supporting tech education)
